

## **Summer 2025**

- ECE671 Wind Plant Project Development (online) [course title will be updated to “Financing Offshore Wind” after August 2025]

## **Fall 2025**

- ECE601 Linear Systems (online and face-to-face modes are both available)
- ECE610 Power Systems Steady State Analysis (hybrid)
- ECE617 Economic Control of Interconnected Power Systems (face-to-face)
- ECE619 Intelligent Sensing for Smart Grid and Smart City (face-to-face)
- ECE654 US Offshore Renewable Energy Policy (online)
- ECE652 HVDC Design, Operation and Maintenance (online)

## **Spring 2026**

- ECE601 Linear Systems (online)
- ECE698 Power System Modelling (online)
- ECE670 Management Strategies in the Power Industry (online)
- ECE611 Transients in Power Systems (online)
- ECE616 Power Electronics (online)
- ECE651 Wind Power Transmission and Grid Interconnection (online)
- ECE628 Power Grid Modernization (online)

## **Summer 2026**

- ECE671 Financing Offshore Wind (online)

## **Fall 2026**

- ECE601 Linear Systems (online and face-to-face modes are both available)
- ECE610 Power Systems Steady State Analysis (hybrid)
- ECE613 Protection of Power Systems (online)
- ECE656 Power System Dynamics (online)
- ECE619 Intelligent Sensing for Smart Grid and Smart City (face-to-face)
- ECE654 US Offshore Renewable Energy Policy (online)
- ECE652 HVDC Design, Operation and Maintenance (online)
